

Australian Marine Technology Pty Ltd

ABOUT US

AUSTRALIAN MARINE TECHNOLOGY PTY LTD IS A GROWING DESIGN, ENGINEERING, MANUFACTURING AND OPERATING COMPANY, SERVING THE COMMERCIAL AND INFRASTRUCTURE INSHORE AND OFFSHORE SECTORS OF THE MARINE INDUSTRY INTERNATIONALLY.

- Headquartered in Australia has established agents in 17 countries.
- AMT has completed multiple marine projects for leading clients international.
- AMT currently serves major companies who are operating in the inshore and offshore sectors across the transportation tourism, logistics, energy and military industries.
- Over the years, AMT has developed an experienced team of management, engineers and staff with significant expertise in the marine sector.

MOC SHIPYARDS PVT LTD. - SUBSIDIARY - INDIA

VESSEL CONSTRUCTION

With the capability to construct vessels up to 70 meters or 1000 tonnes, MOC Shipyards delivers high-quality builds that meet the rigorous demands of both commercial and governmental clients. Our state-of-the-art facilities are equipped with a 50-meter keyway, 100 meters of water frontage, and advanced yard cranes, allowing us to handle complex construction projects efficiently.

NAVAL ARCHITECTURE AND MARINE ENGINEERING

In partnership with Australian Marine Technology, MOC Shipyards offers bespoke design and engineering services at every stage of development. Our expertise in naval architecture is backed by the latest software and technology, enabling us to provide comprehensive engineering services such as hydrodynamic and CFD analysis, structural analysis, seakeeping and stability analysis, and more. Whether you require designs from our existing portfolio or customized solutions, we ensure that every project is executed to the highest standards.

PRODUCT & SERVICES

CARGO VESSELS

(Up to 5,000 Tonnes)

- Landing Craft (LCT): Ideal for transporting goods, vehicles, passengers, fuel.
- Stern Landing Vessels (SLV)
- Roll On Roll Off (RORO): Designed for easy roll-on/roll-off cargo handling.
- Dumb Barges & Bunker Barges: Suitable for bulk cargo and bunkering operations.

PILOT BOATS

- Transport Maritime Pilots Safely: Pilot boats are essential for the secure and efficient transfer of maritime pilots to and from large vessels.
- Reliable Operations in Challenging Waters: Navigate rough seas and tight harbour entrances.
- Support Critical Maritime Operations: Support smooth marine traffic flow in busy ports.

PASSENGER SHIPS

- High-Speed Catamarans: Fast and efficient passenger transport.
- Ferries: Reliable and stable ferry services.
- Displacement Passenger Ships: Comfortable long-distance travel.
- Live Aboard Charter Vessels: Luxurious and well-equipped for extended charters.

PRODUCT & SERVICES

OFFSHORE & SUPPLY VESSELS

- Crew Boats
- Platform Supply Vessels (PSV): Essential for offshore platform support.
- Towing Tugs: Powerful and reliable for towing operations.
- Seismic Vessels: Equipped for geological survey and research.

HARBOUR & TERMINAL VESSELS

- Harbour & Terminal Vessels are designed for efficient line handling, pusher boat operations, and oil spill vessels.
- Maintenance and Inspection: Harbour vessels are used for routine inspections, maintenance, and emergency repairs within the terminal.

WORKBOATS & AQUACULTURE VESSELS

- Multicats and Crane Vessels: Versatile for various marine tasks.
- Aluminium Lobster Boats: Durable and efficient for lobster fishing.
- Longliners: Ideal for longline fishing operations.
- Harvest Work Vessels: Specialized for aquaculture harvesting.

MULTITOOl CROCODILE DREDGE

- The MULTITOOl excels in shallow water dredging where access is restricted.
- It operates effectively on both water and dry land, handling dredging, clearing, and piling tasks.
- Its self-propelled design enhances manoeuvrability and operational efficiency.

MILITARY & SECURITY VESSELS

- High-Speed Interceptors: Rapid response for security missions.
- Police Patrol Vessels: Ensuring maritime law enforcement.
- Ballistic Crew Boats: Protection and transport for security personnel.
- Search & Rescue Vessels: Designed for emergency response and rescue operation.
- Sea Ambulances

QUALITY & SAFETY STANDARDS

QUALITY POLICY

At Australian Marine Technology Pty Ltd (AMT), we are dedicated to delivering top-quality products that meet the expectations of our customers, designers, and regulatory authorities. In collaboration with MOC Shipyards, we adhere to the internationally recognized ISO 9001:2015 quality standards, ensuring that every project is executed with precision and excellence

- **Customer Satisfaction:** Our focus is on meeting and exceeding customer needs through high-quality vessel construction and engineering solutions.
- **Timely Delivery:** We ensure that all projects are completed and delivered on time, without compromising on quality or safety.
- **Continuous Improvement:** AMT is committed to ongoing improvements, regularly monitoring our performance and processes to enhance service delivery.
- **Active Communication:** Our quality policy is communicated across all levels of the organization, ensuring everyone is aligned with our commitment to high standards.

ENVIRONMENTAL POLICY

At Australian Marine Technology Pty Ltd (AMT), we recognize our responsibility to minimize our environmental impact. In partnership with MOC Shipyards, we align our practices with the standards set by ISO 14001:2004, focusing on sustainable and safe operations.

- **Waste Reduction:** We implement processes aimed at reducing waste across all stages of our production and operations.
- **Pollution Prevention:** AMT is committed to preventing pollution through safe operating practices that minimize environmental risks.
- **Legal Compliance:** We ensure full compliance with environmental laws and regulations in all regions where we operate.
- **Commitment to Improvement:** Continuous improvement is key to our environmental policy, ensuring that we adapt and enhance our processes to better protect the environment.
